## SUMMARY

---

I'm a software engineer who loves to create awesome products that meet user needs. I have more than nine years of experience and a track record of delivering successful products. When faced with complex technical problems, I have a knack for troubleshooting and analyzing issues. I work well with others and value open communication. I'm comfortable working in fast-paced environments. Learning new skills is a passion of mine, and I'm always looking for opportunities to improve my knowledge and expertise. Also, I'm pretty strong in algorithms - I've even won some national olympiads in informatics

## TECHNICAL STRENGTHS

---

<b>Programming Languages</b>	Ruby, Go, NodeJS, Python
<b>Frameworks</b>	Ruby on Rails, Echo, NestJS, ExpressJS, VueJS, Django, FastAPI, React
<b>Test frameworks</b>	Jest, RSpec
<b>Databases</b>	PostgreSQL, MySQL, MongoDB, Redis, DynamoDB
<b>Cloud</b>	AWS, GCP, Azure
<b>Web</b>	HTML5, CSS3
<b>CI</b>	Github Actions, CircleCI
<b>Methodologies</b>	Scrum, Kanban, OOP, Domain Driven Design, SOLID, GRASP, TDD
<b>Other</b>	Git, Kubernetes, Terraform, Docker, ElasticSearch, Twilio, Firebase, Wells Fargo API, Intacct Sage API

## EXPERIENCE

---

### Peer Street, Inc. (Los Angeles, CA)

June 2018 - February 2023

*Senior Software Engineer*

*Remote*

- Developed and launched a financial product that attracted over \$3 million in new investments within 5 months
- Integrated banking systems, increasing customer transactions by 44
- Automated financial operations, saving the servicing department 20 hours per day on average, reducing errors by 20
- Enhanced financial data consistency and reduced data loss by implementing Event Sourcing, decreasing data correction request times by 50
- Advocated for Domain Driven Design and Clean Code principles, improving design/development processes and platform maintenance
- Reviewed code and mentored other engineers, ensuring high-quality standards were maintained
- Provided rapid feedback to product managers on feature complexity and development timelines

### Silicon Valley Software Group LLC (San Francisco, CA)

March 2016 - April 2018

*Software Engineer*

*Remote*

- Led a team of three frontend developers in designing and developing complex applications using React and Node
- Introduced unit testing and integration testing, increasing application stability
- Established automated code reviews with linters and set up CI/CD pipelines using TravisCI, CircleCI, and Github Actions
- Reviewed code, mentored junior developers, and fostered a culture of high-quality coding standards
- Enhanced code quality across multiple projects during and after active development phases

**Appcast Inc. (Boston, MA)**

October 2015 - February 2016

*Ruby on Rails Developer**Minsk, Belarus*

- Developed API services using Ruby on Rails framework
- Refactored and optimized Cost Per Action estimation algorithm for improved performance
- Implemented user interface features in a web application built with Angular

**SivinTech LLC**

December 2014 - September 2015

*Ruby on Rails developer**Minsk, Belarus*

- Designed and implemented a call center for SivinTech's client, utilizing Twilio as the communication platform
- Migrated legacy Java applet to Angular, modernizing the application and improving its performance

**EDUCATION**

---

**Belarusian State University Of Informatics and Radioelectronics, Minsk***2013 - 2017*

Faculty of Computer Systems and Networks

B.S. in Computer Science &amp; Software Engineering

**Belarusian State University Of Informatics and Radioelectronics, Minsk***2017 - 2020*

Faculty of Computer Systems and Networks

M.S. in Computer Science

incomplete degree

**HONORS & AWARDS**

---

Competed in RuCTF 2015 competition as part of the team from our university. Our team took 2nd place.

Competed in Belarus National Olympiad in Informatics in 2013. Took 1st degree diploma.

Competed in Individual Olympiad in Informatics and Programming in 2013. Took awardee diploma.

Competed in Belarus National Olympiad in Informatics in 2012. Took 2nd degree diploma.

Competed in Belarus National Olympiad in Informatics in 2011.
